OBJECTIVE:

The objectives of the workshop are listed as below:

- To create awareness on Pharmacovigilance, Medical Coding career prospects in the current market scenario.
- To guide the students for attainment of real-time industry exposure.
- To equip students with information on the skill-set expected by the industry.
- To inculcate the right behavioral aspects needed in a corporate environment.

Pharmacovigilance: Pharmacovigilance is the process of evaluating and improving the safety of medicines. It plays an essential role in the early detection of drug-induced harm. Every medicine is tested on a relatively small number of people before it is approved for use by the wider population, where previously undetected reactions can emerge. Each patient is a unique medicines user with a distinctive lifestyle and circumstances. Medicines that cause serious adverse drug reactions (ADRs) need to be re-evaluated or removed from the market to protect public health.

Medical Coding: Medical Coding is assigning codes to diagnose and procedures which help in financial reimbursement from insurance companies. Medical Coders convert the physicians note into codes that is utilized by the insurance provides in compensating the health care provider.
