### 2.3.1 (C) PROBLEM SOLVING METHODOLOGY

The educational institution has adopted a systematic approach to solving problems for students based on the promotion of critical thinking skills, analytical skills, and knowledge application.

The learning process is centered around experiencing learning through various means including analysis of cases, project learning, group discussions, and analysis of real-world scenarios. Learners are required to be able to identify the problem, gather all the necessary information, analyze alternative ways of acting, and offer practical solutions.

ICTs, online information sources, and a well-stocked library enable learners to access current information and develop their problem-solving abilities.

To promote the development of these skills, the educational institution organizes training programs aimed at fostering innovation, creativity, and decision-making abilities. Methods such as assessment and presentations are utilized in monitoring learners' progress. Faculty members act as mentors to learners and encourage them to think independently and adopt a multidisciplinary approach. An approach
