PHOTOGRAPHS OF FACULTY ATTENDING ONLINE

Dated: 28th and 29th October 2021

Outcome of the programme:

The faculty and delegates availed knowledge on the prominent Pharma industry trends include artificial intelligence (AI), additive manufacturing, blockchain, and other Industry 4.0 technologies. There were sessions on Some recent developments are the development of spatial aggregation propensity for detecting protein aggregation, advances in drug-delivery technologies involving microencapsulation and nanocoating's, and tools to understand the risk of nanomaterials in drug-delivery systems. It was very beneficial for updating the knowledge on these points.

REPORT ON THE PROGRAM

Title: Hands on Training In Analytical Instruments

Date: 21st to 27th-11-2021

No. of faculty attended: 22

Objectives:

- To know the Role of Instruments in Quality control of drugs and Pharmaceutical formulations
- To Elevate the Innovative works in the Research area through Advanced analytical instruments
- To know the handling of analytical instruments such as HPLC, IR, UV, SPECTROFLUORIMETER, KARL FISCHER TITRANT ,etc.,

Outcome of the session:

- A total number of 22 faculty members from various departments of the institution participated and gained the knowledge on Various Analytical Instruments like HPLC, SPECTROFLUORIMETER, FT-IR, UV-VISIBLE SPECTROPHOTOMETER and KARL-FISHER TITRATOR.
- Now other department staffs are also able to Handle the analytical instruments, interpretation of results and calibration of instruments.

Outcome of the Workshop:

Experiential training such as the Clinical Pharmacy practice experience, remains integral to the Pharmacy curriculum. By serving as an opportunity for students to practice patient care, Clinical practice experiences are an ideal environment for students to fully learn and actively apply the knowledge and skills acquired during the classroom/lecture-based components of their undergraduate Pharmacy programme. With the guidance of hospital and faculty preceptors, students in clinical practice experiences conceptualize the role of pharmacists in delivering effective pharmaceutical care.

Outcome of the programme:

The session was conducted for the faculty and students upliftment in their thought process. Ideas from various faculty and students were presented. This was very useful in understanding the importance of Proof of Concept. The proof of concept is so valuable because it's a pilot project to evaluate the feasibility of your plan before work begins, similar to a prototype or lean manufacturing “**minimum viable product**”. A POC verifies that concepts and theories applied to a project will result in a successful final product. In the same programme faculty presented about Heart Risk Assessment App, Bioplastics, Herbal sanitizer, Pill Box, Robotic Pharmacy, QR code system for SOP's analysis, etc.,
